### HIGH FLIGHT PROGRAM

#### **What is High Flight?**

Established in 1998, High Flight is an adventure-based program designed to develop self-confidence and social skills in youth and teens. The program adopts the philosophy "to try is to succeed," encouraging and empowering all participants to challenge themselves and push their limits while in a safe and accepting environment.

Each session, families are encouraged to attend activities designed to foster positive relationships and support their youth's development. Families are encouraged to communicate with the staff about their youth's progress in the program. Every session, High Flight participants develop a sense of responsibility and connection to their community by taking part in a service project such as trail maintenance, conservation initiatives, recycling and other volunteer efforts.

#### **How Do I Participate?**

Youth and teens ages 12-17 are referred to the program through school counselors, social service agency or community organizations. Parents can also make referrals.

#### **General Info**

High Flight runs three 10 week sessions during the school year as well as two 4 week sessions during the summer. During the school year groups meet up to 2 times after school until 6pm. Groups also meet every other Saturday from 10am-4pm.

Each 10 week session includes an overnight camping trip as well as a three day backpacking trip at the end. The MetroWest YMCA can provide limited transportation to and from local schools or the Framingham YMCA. Due to time and logistical restraints some families are requested to provide transportation to the Family Outdoor Center in Hopkinton. The program fee is based on a tiered pricing scale, according to the families' income. Financial Assistance is available for those who qualify. All equipment is provided as are some personal items according to need.

# LIVESTRONG

LIVESTRONG®

More than 12 million cancer survivors live in the United States, and 3 out of 4 families will help care for a family member with cancer. Recent medical research has shown that exercise can counteract the often debilitating side effects of cancer treatment. When cancer survivors participate in moderate levels of physical activity, fatigue is reduced, physical strength is increased and quality of life is significantly improved. Unfortunately, many cancer survivors do not engage in any activity during and after treatment because they don't know where to go for the special kind of program they need.

LIVESTRONG® at the YMCA is free, 12 week program designed for small groups of adult cancer survivors. The goal of the program is to help participants build muscle mass and strength, increase flexibility and endurance, and improve functional ability. Additional goals include reducing the severity of therapy side effects, preventing unwanted weight changes and improving energy levels and self esteem. The program is led by our staff that have been specially trained in the physical and emotional needs of cancer survivors.

When a cancer survivor walks through our doors, they will become a part of the YMCA family. LIVESTRONG® at the YMCA will engage cancer survivors by focusing on the whole person and will provide a supportive, community environment where people affected by cancer can connect during treatment and beyond.

**For more information about LIVESTRONG® at the YMCA, please contact Laura Gilbert at (508) 879-4420 x32.**
